## CE READINESS AND EXERCISE EVALUATION TEAM UNEXPLODED ORDNANCE (UXO) TRAINING KIT

### SYNOPSIS:

HQ AFCESA, in coordination with the Army Training Support Center, has established a standardized UXO Training Kit to enhance training conducted by CE Readiness Flights and exercises conducted by installation Exercise Evaluation Teams (EET).

### DETAILS:

In an effort to both standardize and enhance Air Force contingency training and exercise programs, we have established a Readiness UXO Training Kit. The contents of the kit were determined by a consortium of Readiness, Explosive Ordnance Disposal, and Army Training Support Center subject matter experts. They represent a broad cross-section of wartime munitions below the 250-pound threshold (which includes bombs, rockets, mortars, mines, and submunitions). The kit is NOT mandatory at this time. It is locally funded and may be purchased by any AF elements conducting contingency training or exercises. When used outside the classroom, controls should be in place to ensure training devices aren't "left behind" or otherwise misplaced.
